MCSE 2003 Client and Server Training

Objective: Learn the new advanced concepts, features, and tools of the Windows Server 2003 Operating System, in a hands-on, Windows Server 2003 environment.

Prerequisites: MCP/MCSE in NT4.0, or 6 months experience in a Win NT4.0 or Windows 2000 networking environment.

Recommended Textbooks (optional):

- MCSE Training Kit (Exam 70-270): Windows® XP Professional
- MCSE Self-Paced Training Kit: Microsoft® Windows Server™ 2003 Core Requirements, Exams 70-290, 70-291, 70-293, 70-294

Target Audience:

- Technical professionals desiring credentials and advanced networking knowledge.
- Displaced networking professionals looking to enhance job skills and marketability.

Course Main Learning Objectives and Outcomes:

- Implementing and Supporting Microsoft Windows XP Professional (2272)
This module addresses the implementation and desktop support needs of customers that are planning to deploy and support Microsoft Windows® XP Professional in a variety of stand-alone and network operating system environments.
Prerequisite: High School diploma
- Maintaining a Microsoft Windows Server 2003 Environment (2275)
This module provides students with the knowledge and skills that are needed to effectively maintain server resources, monitor server performance, and safeguard data on a computer running one of the operating systems in the Microsoft Windows Server™ 2003 family.
- Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure: Network Services (2277)
This module provides students with the knowledge and skills to implement, manage, and maintain a Microsoft Windows Server™ 2003 network infrastructure. The course is intended for systems administrator and systems engineer candidates who are responsible for implementing, managing, and maintaining server networking technologies.
- Planning and Maintaining a Microsoft Windows Server 2003 Network Infrastructure (2278)
This module provides students with the knowledge and skills necessary to plan and maintain a Windows® Server 2003 network infrastructure.
- Planning, Implementing, and Maintaining Microsoft Windows Server 2003 Active Directory Infrastructure (2279)
This module provides students with the knowledge and skills to successfully plan, implement, and troubleshoot a Microsoft Windows Server™ 2003 Active Directory® directory service infrastructure. The course focuses on a Windows Server 2003 directory service environment, including forest and domain structure, Domain Name System (DNS), site topology and replication, organizational unit structure and delegation of administration, Group Policy, and user, group, and computer account strategies.
